SPIRIT

## OXO Spirit 1

This structure allows storage at a low cost per barrel, up to 7 levels high. Each barrel is independent and can be moved safely while empty with the Minilift. OXO Spirit 1

maximizes storage apacity, easy handling and operations that relate to the elevage of beer and spirits (racking, topping etc ...). Each barrel can be accessed and worked on without having to remove it from its location in the stack throughout its life span. This results in an unparalleled gain in productivity and safety.

Barrel type: 225 L, 228 L, 300 L, 350 L, 400 L, 500 L

## OXO Spirit 2

This development incorporates all the advantages of OXO Spirit 1 and the integration of the possibility of moving empty barrels with the Superlift and full barrels with the OXOlift. In addition, this new space-saving architecture has increased the space from the drain to the bung thereby facilitating more operations that relate to the elevage of spirits.

OXO Spirit 2 easily integrates into all cellars and has become a reference for barrel storage barrels solutions in many great Cognac houses and spirit producers.
